PhotoShop Essentials

This course is designed for beginners who want to learn the basics of Adobe Photoshop. Participants will gain essential skills in image editing, colour correction, retouching, and more.

Upon successful completion of this course, participants will be able to:

- **Overview of the Photoshop interface –**

  - Navigate menus, shortcuts, tools, panels and workspaces.
  - Arrange images.
  - Select screen modes.
  - Zoom and scroll.
  - Manage preferences and file information.
  - Understand resolution.
  - Explain common graphic formats and when to use them.

- **Selection Techniques -**

  - Apply tools & methods for making, modifying and refining selections.
  - Use advanced options like the Select and Mask workspace.

- **Working with Layers -**

  - Masking pixels.
  - Manage layers (visibility, renaming, linking and blending modes).
  - Implement techniques for duplicating, merging and flattening layers.
  - Apply layer styles.
  - Work with .PSD files.

- **Colour Correction and Adjustments -**

  - Work with adjustment layers.
  - Apply key commands for brightness, contrast, hue and saturation.

- **Cropping and Transformations -**

  - Resize, extend and aligning images.
  - Apply basic transformations for design projects.

- **Output and File Preparation.**
